Industries we love

Banks and Insurance

Banks worldwide are among the most critical infrastructures. Our specialists have contributed to major banking projects in over 10 countries.

Retail

Infrastructure and AI projects for retail are among of our beloved projects. Results of our chat bots, analytics bots could enlarge your average check from visitors several times.

Manufacturing

What is main need of any factory? Quick infrastructure, more automation and low cost of manufacturing. While we can handle first and second points you can focus on third one.

Services we offer

AI

Our AI Engineers will be more than happy to create modern chat or analytics bots for your business.

BI and Data Analytics

In modern world each company has a lot of information about customers, but in most cases this information is stored “somewhere” and not in use. We can assist you to create modern dashboards and reports for your business. Integration with AI bots could speed up decision making process.

Cloud and Infrastructure

The most important thing in any business is to maintain 24/7 operations for most critical systems. Our administrators and architects can assess, tune and rebuild your infrastructure to guarantee business continuity.

Core banking services

We offer high skilled services to maintain, develop and update your Core banking based on Oracle FlexCube technology
